Primary Regulators	FDIC and state banking regulator (FFIEC member agency); state Department of Insurance for the agency subsidiary

Tri-State Community Bancorp is a privately held regional bank holding company headquartered in Cincinnati, Ohio. The bank operates 18 branches across the Greater Cincinnati and Northern Kentucky area, offering retail deposit accounts, residential and commercial lending, treasury management, and wealth management services. A small wholly owned insurance agency subsidiary distributes personal and commercial lines policies to existing bank customers.

The bank's core processing is hosted by a third-party core banking provider. Internal staff use Microsoft 365 for email and collaboration, and the bank maintains an on-premise data center for branch operations alongside one

cloud-hosted workload (document imaging/storage). Loan origination is handled through a third-party SaaS platform integrated with the core system.

Key Systems and Assets

- Core banking platform (hosted by third-party processor)
- Online and mobile banking applications
- Loan origination system (third-party SaaS)
- Microsoft 365 environment (email, file storage, collaboration)
- Document imaging/storage system (cloud-hosted)
- Employee endpoints (laptops, branch workstations)
- On-premise data center (branch network infrastructure, core backup systems)

Key Third-Party Vendors

- Core Processing Provider — hosts and operates the core banking system
- Loan Origination Platform Vendor — SaaS platform integrated with the core system
- Cloud Backup/Document Imaging Provider — hosts scanned customer documents and backups
